HAWK SHELTER

ABOUT US

*As **Tek Metal Security Systems**, we have been doing the facade engineering works of qualified steel, steel structures and multi-storey buildings for years. Our 20 years of experience in the metallurgy and construction industry now conduct modular shelter cabins with the **HAWK SHELTER** brand. We also manufacture mine escape rooms, special safe compartments and panic rooms for civilian use.*

Based on the fact that the need for security is not a luxury consumption and everyone needs access to this service, the shelter cabins we produce can be installed wherever you want on your land or can be integrated into existing buildings. Whether it's a safe and private space for you and your family in difficult times, or a secluded and highly secure space where you can store your private files or valuables in your home.

There are always dangers. Take action while there is still time.

WHAT DO WE PRODUCE?

We have been producing premium steel constructions and developing steel facade and wall systems since 2008. Our products turn into safe structures that protect people and all their values in many parts of the world.

*Now, with our **HAWK SHELTER** brand, we transform our steel construction and custom fabrication facade experience into solutions for underground bunkers, hidden safe rooms, high-end bunker systems with NBC filtration system and panic rooms. We design, manufacture and build a special shelter for you with all the infrastructure that will protect you, your loved ones and assets under all circumstances.*

Our shelters are designed to ensure that you stay alive and safe with minimum facilities against unforeseen threats. Our experts analyze all risks and build robust and isolated environments that can fully meet your long-term shelter, security and storage needs in extreme conditions where access to energy, shelter and food is difficult or even impossible.

We design, produce and ship internationally.

*As **HAWK SHELTER**, we manufacture shelter cabins in three main models and in six different sizes. We also do special shelter projects designed according to the terrain and customer needs.*

ECO SHELTER

Technical Details

Ventilation system
220V input
12 Volt LED interior lighting

AUXILIARY PRODUCTS

In addition to standard-equipped shelters, we also manufacture shelters with extreme threats, conventional warfare, chemical, biological or radioactive fallout detection and filter systems.

Our aim is to provide a safe space for you and your loved ones to get over the first shock in the face of such a threat, and shelter until the conditions are relatively stable.
